

FACTS Turf Training Courses

From the Sports Surface Experts at STRI

'Understanding plant nutrition and fertiliser types, environmental issues and legislation'

21st - 25th June 2010 at STRI, Bingley

The experts at STRI offer a dedicated course for the **FACTS Turf** qualification. It is a four day course of modular design to cover all aspects and issues concerned with fertiliser application to turf.

The **FACTS Fertiliser Certificate of Competence** is the national qualification for all those advising on the use of fertiliser products. The qualification is certificated by

BASIS and advisers holding the certificate become members of the **BASIS Professional Register** and **FACTS Annual Scheme**.

The **FACTS Turf** qualification has been designed for anyone providing advice on fertiliser application to sports and amenity turf. Qualification is obtained by evidence of understanding of plant nutrition and fertiliser types, environmental issues and legislation.
